PROFILE

Full-stack developer with 4+ years of experience, all at Pixeldart where I grew from intern to senior in two years. I work across the whole stack — React and Next.js on the frontend, Node.js and NestJS on the backend — and have shipped features across B2B dashboards, e-commerce platforms, CMS tools, and multi-tenant SaaS products. I like owning things end-to-end: from API design to UI to getting it live. Currently pursuing MCA part-time. Open to full-time or contract roles.

SKILLS

Frontend	React.js · Next.js · TypeScript · JavaScript (ES6+) · Tailwind CSS · HTML5 / CSS3
Backend	Node.js · NestJS · Express.js · REST API Design
Databases	PostgreSQL · MongoDB · Redis
Tools	Git · GitHub · Docker · Postman · Agile / Scrum
Concepts	Multi-tenant SaaS · Component Libraries · Microservices · Third-party API Integration

EXPERIENCE

Senior Full-Stack Developer — Pixeldart Software Services

Jan 2024 – Present

Surat, Gujarat · Full-time

- Own features from first commit to production — API design, frontend, and deployment — across multiple live SaaS products.
- Built backend architecture for a multi-tenant SaaS platform using NestJS and PostgreSQL, handling data isolation per client from the ground up.
- Built a shared React component library now used across projects, cutting repeated UI work significantly.
- Review code, unblock junior devs, and maintain TypeScript standards across the codebase.
- Work directly with product and design to scope and ship features without hand-holding.

Junior Full-Stack Developer — Pixeldart Software Services

Apr 2023 – Dec 2023

Surat, Gujarat · Full-time

- Took full ownership of features across frontend (React/Next.js) and backend (Node.js/NestJS).
- Integrated third-party APIs — payments, analytics, CMS — into production SaaS apps.
- Designed database schemas in PostgreSQL and MongoDB for real client workloads.
- Introduced a structured PR review process that improved code quality across the team.

Full-Stack Developer Intern — Pixeldart Software Services

Apr 2022 – Mar 2023

Surat, Gujarat · Internship

- Worked in a live production codebase from day one — React, Node.js, NestJS.
- Built UI components and helped integrate APIs on live client projects.
- Converted to full-time after 12 months based on delivery, not just tenure.

PROJECT DOMAINS

- B2B SaaS Dashboards — multi-tenant setup, role-based access control, real-time data views.
- E-commerce — product catalogue, cart and checkout, payment gateway integration end-to-end.
- CMS Platforms — content pipelines, rich-text editing, Next.js SSR/SSG for dynamic pages.
- Marketing Sites — fast-loading landing pages, SEO-friendly rendering, strong Core Web Vitals.

EDUCATION

Master of Computer Applications (MCA) — Jain (Deemed-to-be University)

Aug 2024 – Dec 2026

In progress — part-time alongside full-time work

Bachelor of Computer Applications (BCA) — Veer Narmad South Gujarat University

Aug 2021 – Jan 2024
